ProVoidGard

ProVoidGard is an adjustable, cost-effective and practical system that enables shippers to fill a variety of void spaces with one product.

Shippers often transport multiple-sized packages creating multiple-sized voids. ProVoidGard can be adjusted in length to eliminate the need to stock a variety of void filler sizes.

Designed to address the inherent limitations of other lashing systems. It provides shippers with a practical, flexible and dependable method of filling voids that delivers added value.

Available in two sizes: size L is used for voids between 21 and 37 cm, and size XXL is used for voids between 40 and 72 cm. Made of a special polymer that offers high compressive strength.

Why we recommend the ProVoidGard?

- Adjustable
- Economical
- Seconds to install
- Cost saving shipping pattern
- Reusable
- "AAR" * approved compression strength
- Moisture stable for reefers
- No tooling Required.
- Extremely Safe to Install
- Reduces excess inventory, saving floor space (foldable system)
- Can be used for center loading single pallets
- Innovative

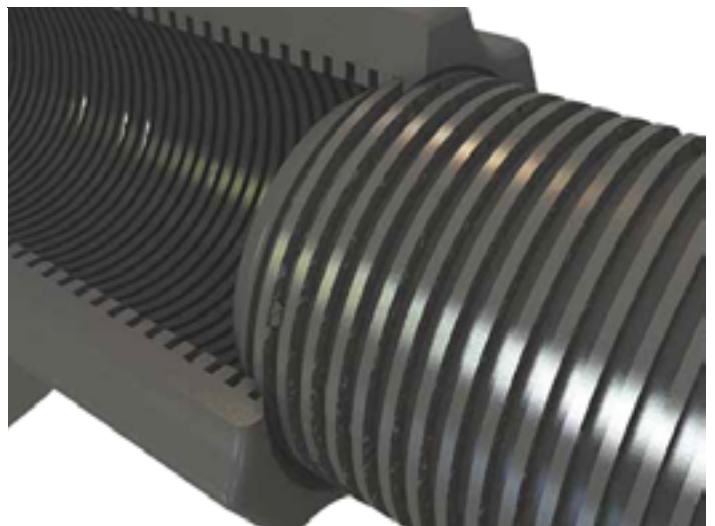

* Association of American Railroads

ProVoidGard application

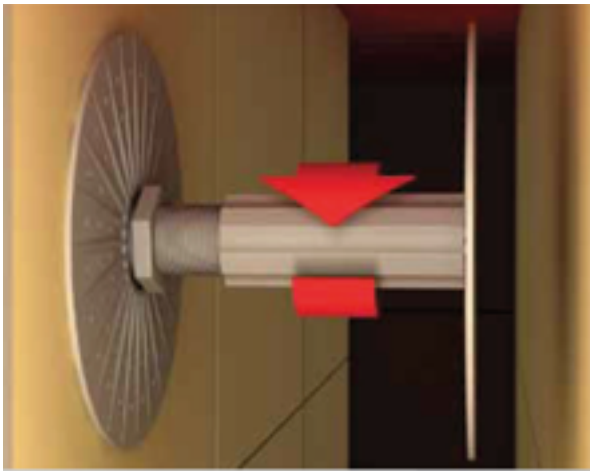

ProVoidGard thread detail

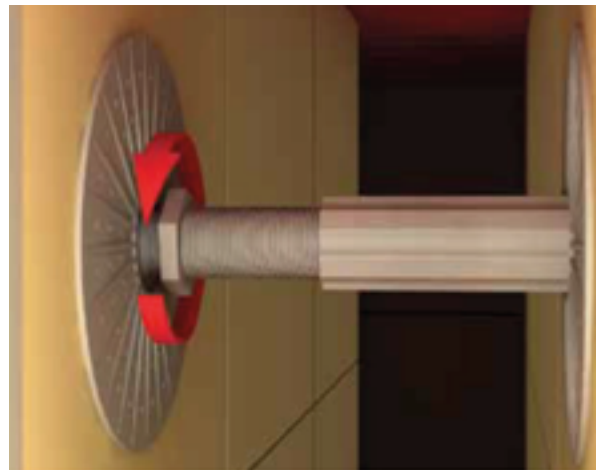

ProVoidGard How to use

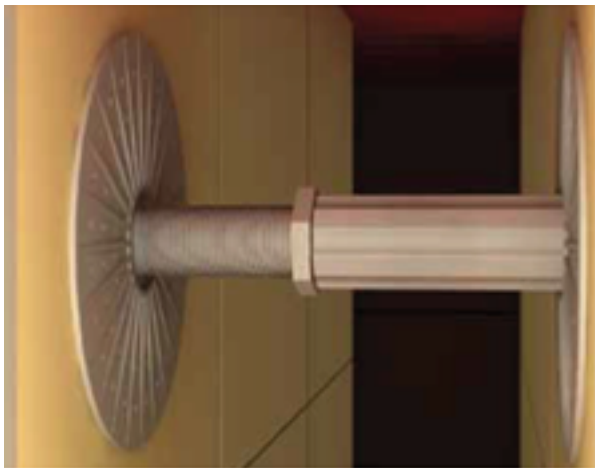

1. Peel release liner and press the adhesive coated bulkhead against the cargo.

2. Rotate and unscrew the unit to the desired length until ProVoidGard is firmly in place.

3. Shuttle the locking washer into position.

4. ProVoidGard is in position, and load is secured against lateral shifting.
