ProLash

Lashing straps and cargo mooring systems

The entire ProLash range for the lashing and mooring of goods is made of high-quality polyester and is approved and certified by various international laboratories, available in various types of width and resistance and suitable for being used in trucks, sea containers, ships, trains, flat racks...

ProLash

ProLash lashing straps and cargo mooring are a fast, efficient and low-cost system that replaces traditional mooring systems, metal strips and chains. All ProLash products are certified by Germanischer Lloyd. The ProLash certified lashing straps and cargo mooring are available in widths between 32mm and 50mm and with linear resistance up to 7,500 daN.

ProLash Sheet

PROLASH SHEET is a lashing system for sea containers that is easy to place and ideal for those goods without palletizing. It is a raffia panel made with 4 carabiners in the corners, used to prevent the merchandise from moving backwards and avoid any type of accident. It is also often used to prevent possible theft when the merchandise is covered.

ProLash Container Set

It is a mooring system to prevent backward movement of the goods. Very easy to use as it comes pre-assembled. Each set consists of 2 sections of vertical ribbons with 2 carabiners at the ends, so it can be easily anchored in the upper and lower rings of the container. From them they come out 2, 3 or 4 parallel ribbons that are connected with buckles. Recommended system by the CTU code of the IMO.

ProLash C-AS

The PROLASH C-AS fastening system is a practical and Easy solution to hold the final part of the load, avoiding that the merchandise can be moved to the door of the container. This system is recommended by several shipping companies for the cargo of dangerous goods, following the CTU code of the international maritime organization (IMO).

ProLash Door

To avoid accidents that occur at the time of opening container doors we have the ProLash Door system which consists of a very resistant tape and with some hooks in the ends to be able to embrace the 2 vertical bars of the container doors. So we avoid the fall of the merchandise towards us when opening the doors.

ProLash TY Gard

PROLASH TY-GARD is the most versatile containerized hazardous merchandise protection system on the market today and is approved to secure cargo in sea containers with drums, Big-Bags, IBC's, dangerous goods, explosives and all type of palletized merchandise complying with the standards of cargo insurance established by IMDG, FMCSA, USCG and the ADR RID and the AAR.
