# Niupack

## The best way to fill the gaps between pallets

## Niupack

Niupack is the definitive solution to displacements and falls of goods during transport thanks to the fact that it fills the gaps between the pallets, and thus avoid movements and inclinations of goods during transport.

Its appearance is that of a piece of corrugated cardboard with a drop-down honeycomb. This innovative solution for filling gaps has been fully developed by J2 Servid.

Medidas Standards	Tipo	Grosor
<b>Niupack</b>	Niupack TOP 60	60mm.
	Niupack TOP 75	75mm.
	Niupack TOP 85	85mm.
	Niupack TOP 100	100mm.
	Niupack TOP 120	120mm.
	Niupack TOP 150	150mm.
	Niupack TOP 200	200mm.
	Niupack TOP 300	300mm.

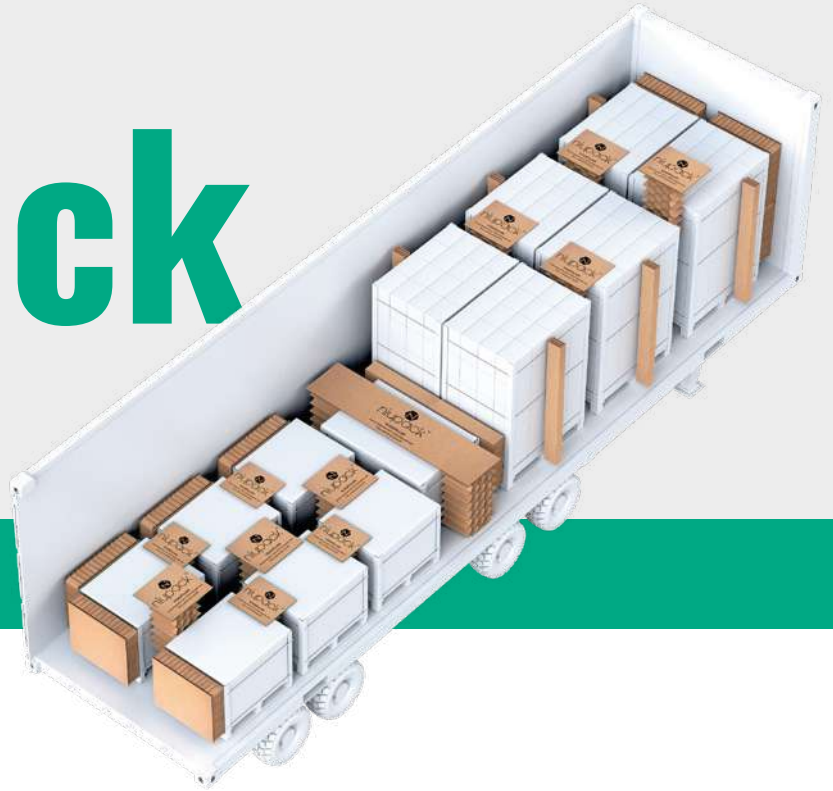

## Custom manufacturing

We have a wide range of Niupack models than can solve the problem of the load movement during transport.

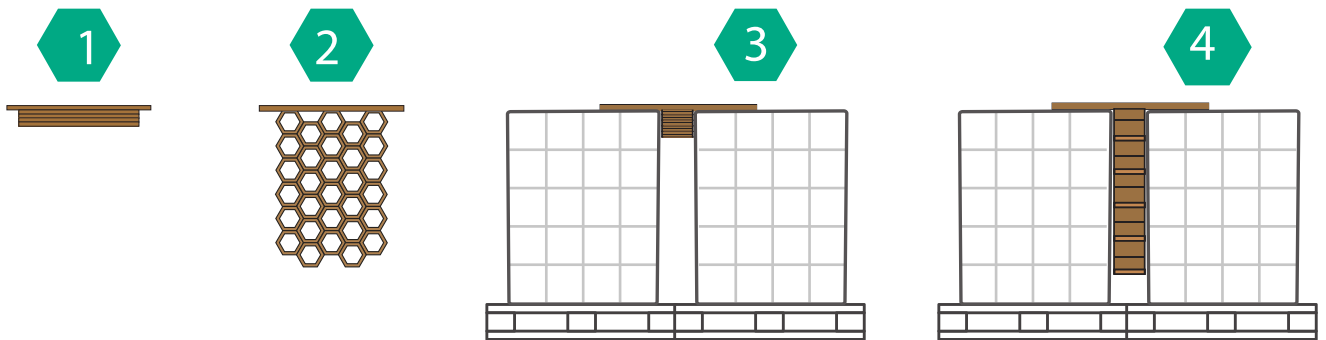

Any model can be manufactured to the customer's needs.

VOIDFILLERS

# Niupack

The transport protection system that prevents the movement of loads.

1 Economic

2 Effective

3 Resistant

4 Recyclable

Unique

Fast

Patented

Foldable

## Niupack Large

Ideal system for shipping containers and for filling large gaps between the pallets. Quick installation and easy handling, very resistant and 100% ecological.

Niupack Large is a very easy and fast system to use and is an ecological alternative to current solutions.

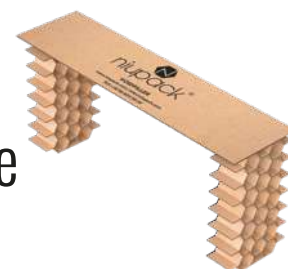

## Niupack Top

Niupack Top is a fast-filling system to cover the gaps between pallets inside the truck. With Niupack Top we will prevent the merchandise from rocking or tipping, which can cause damage avoiding the domino effect. This system will be really useful when we are faced with a load that does not cover the entire from the base of the pallet and is mainly aimed at sectors with a large consumption such as food, beverages and the non-food sector.

## Niupack Double

Ideal for covering existing side gaps when you have to place a pallet in the center of the truck/container to compensate for the axle weight distribution. Also used to gain space longitudinally in containers.

The Niupack Double is available in different resistance formats.

## Niupack Side

It is a Niupack model very similar to the Top model but with the peculiarity of the shorter and foldable upper lid, thus allowing easy placement inside the stretch film and being able to load pallets easily with the built-in Niupack Side.

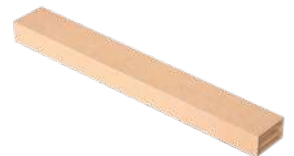

## Niupack Box

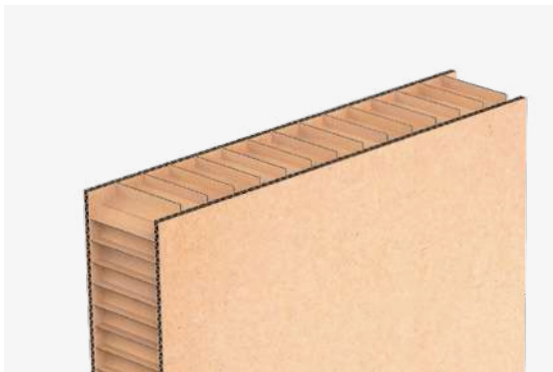

It is a patented, highly resistant folding honeycomb panel system. It has the advantage that can be folded for transport or storage and thus save a lot of space in transport and storage. Available in various sizes.

## Niupack Block

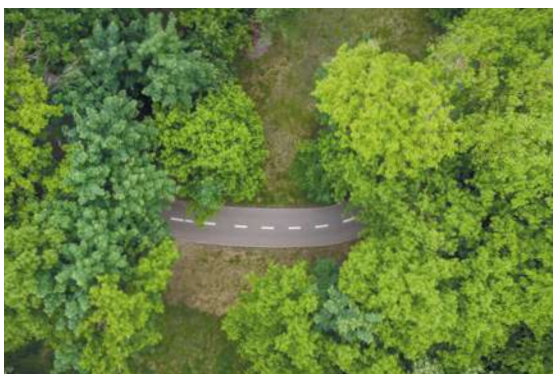

Custom-made honeycomb cardboard blocks, ideal system for rigid goods. Avoid impacts and collisions between the pallets. Mainly aimed at sectors of machinery, electronics and small packs.

## Niupack Panel

Rigid gap filling system for containers and trucks that consists of a large, corrugated cardboard panel in honeycomb structure. Ideal to protect the sides of the pallet and to separate and stabilize stacked pallets.

## CERTIFICATES

At J2 Servid we have the FSC and PEFC certifications, which allow us to prove that the raw material of forest origin that we use in our company comes from managed forests according to sustainability criteria. In this way, we assure our customers the sustainability of the product that we are offering. If you want your certified Niupacks, do not hesitate to ask for them with certification.
