## ProBag Cairgo

Our standard model of dunnage bags for lashing goods. Its placement prevents movements and damage to the merchandise during transport, whether in a sea container, or in a truck, train, ship hold, etc.

## ProBag Square

This ProBag model is ideal for filling large gaps, especially in those loads where there is an odd number of pallets. Their main advantage compared to other types of ProBag is that fills much more volume between the load, thus the resistance and the effectiveness is much higher than in a standard ProBag. Product very used in Reffer containers.

## ProBag Hanger

This ProBag has been designed for lashing cargo with very high pallets. It is a conventional dunnage bag, but it has a rigid and flat support in the upper part, which allows the bag to rest between the pallets during inflation.

## ProBag Adhesive

As its name suggests, this dunnage bag has an adhesive system on the back to be able to stick the ProBag to the pallet or to the container. In this way, the bag is held during its swollen process.

## ProBag Blocker

One of the newest ProBag from J2 Servid. It is the union of two dunnage bags by a layer of raffia. This innovative system acts as a block in the final part of the load, preventing the merchandise from moving backwards. Product widely used in Reffer containers.

Its Y-shaped inflation system allows to inflate both bags at the same time.

## ProBag Container

This ProBag model, also adhesive, is manufactured according to the customer needs and tailored to the 20' and 40' container. It is ideal for very long loads, since with a single product we protect the merchandise without the need to use multiple ProBags.

## ProBag Twin

Like our ProBag Square model, this lashing system is made up of two dunnage bags joined by two raffia straps. Unlike the first, this model is designed to fill gaps between the merchandise of up to 100 cm. Product widely used in Reffer containers.

## ProBag Tools

At J2 Servid we have a wide range of tools for the inflation and care of our ProBag. Our salesmen will advise you on the accessories and tools for an easy and comfortable use of ProBag dunnage bags.
