SEPARATOR

ProVoidGard

This J2 Servid product is a lashing system that prevents the lateral and longitudinal movement of the applied load manually without tools. ProVoidGard is available in two sizes: size L used for openings of 21-37 cm and the XXL size used for openings of 40-72 cm. It is made with a special polymer that offers a lot of compressive strength. In addition, it is approved and certified by the AAR. It is a perfect system to reuse.

CORNERS

ProEdge

We can sometimes find that the lashing straps may damage the cover of our freight, or our pallets. To avoid these minor damages, at J2 Servid we offer a wide range of protective ProEdge corner protectors for all types of merchandise. We have special reusable corners in various sizes for paper reels, for drums, reusable, flexible and non-slip.

ANTI-SLIPS

ProSlip

We have two types of anti-slip for transport, the one made of rubber to place under the base of the pallet and the one made of paper to place between the boxes or sacks that are on top of the pallet.

The ProSlip rubber complies with the German regulations VDI2700 and is highly recommended for use in transportation by road to comply with UNE 12195-1 regulations.

LASHING SYSTEM

ProStrap

ProStrap lashing straps are made from high quality polyester and are approved and certified by various international laboratories and are available in various types of width and resistances.

We have the composite type and the textile type, both of a great resistance and suitable for palletizing any type of merchandise.
